IN WAKE OF TORNADO

Storms have swept over several states leaving death and destruction behind. Scores have been killed, hundreds hurt and thousands made homeless, according to dispatches that have been sent out to the stricken districts. Destruction of buildings is no new thing in connection with the fierce storms which sweep the central states occasionally, but destruction of homes now, means much more than it did a few years ago.

If the general housing situation has been bad, how much worse will it be now that the storm has leveled hundreds of dwellings?

The indications are that relief must be sent to many of the more stricken districts. The relief problem will be more difficult because of the lack of dwellings in which to house those who have lost their all in the blast. The only fortunate thing about the entire matter is the fact that it is spring and that suffering from cold is not likely to be as serious as it might have been.

How to rebuild the homes destroyed by the tornado is a big question, especially in the case of the wage earners who owned the homes in which they live. Out of the disaster may come some plan of federal aid which is being advocated rather strongly in many quarters.

THE TENNIS CLUB

"The gymnasium is to the physical welfare of a community what the library is to its mental welfare," an educator said recently. In this connection it is pointed out that Ogden has a public library but no public gymnasium. However the matter of a gymnasium is being speeded along by the Weber college.

But there cannot be too many organizations which encourage and tend to bring about betterment in the physical well-being of a community and for that reason the efforts of a group of Ogden men to organize a bigger and better tennis club are deserving of support.

Nobody will make any profits from the proposed Ogden tennis club. Plenty of men are willing to do the hard work necessary to get the institution going and they want nothing out of it except the satisfaction of knowing that Ogden will have a first class set of tennis courts and a chance to compete with other cities in this sport.

One hundred men are necessary to bring about the establishment of the club with facilities. The group working for the organization of the club has obtained the names of 60 members and when 40 more have signed the role as charter members the plans may proceed.

It is to be hoped that the enthusiasm which has greeted the announcement to the proposed club will not wane until sufficient members have been obtained to bring about the results desired.

SUNDAY IS EASTER

Next Sunday is Easter, one of the most impressive of the Christian festivals, yet many of the customs of Easter time come to us from the pagans.

The very name Easter comes from

Osata, a goddess of the spring in the Teuton mythology. The worship of Osata was carried to England with the invasion by the Saxons. Some of these pagan features were given a spiritual significance from the Christian standpoint and retained in the Christian observance of the occasion.

The egg enters into the observance in view of the use of the egg to express the resurrection idea. In olden times in England an egg was dyed a brilliant color, blessed and used as an amulet.

The proper time for the celebration of Easter has occasioned much controversy. In the second century a dispute arose on this point between the Eastern and Western churches. The great mass of the Eastern Christians celebrated Easter on the fourteenth day of the first Jewish month or moon, considering it to be equivalent to the Jewish passover. The Western churches kept it on the Sunday after the fourteenth day, holding that it was the commemoration of the resurrection of Jesus. The Council of Nice in 325 decided in favor of the Western usage.

The controversy as to the celebration of Easter in England was settled by the adoption of the Roman usage at the Council of Whitby in 664.

Easter never occurs before March 22 or after April 25. In 1761 and in 1818 it fell on March 22, but neither in this nor the following century will such be the case again.

Incidentally Easter next year will fall upon March 27.

Beginning Friday evening, April 2 and ending Saturday, April 10 the Jewish festival of liberty, known as Pesach, or Passover, takes place.

According to information furnished by the Jewish Holiday press, notice bureau Passover was originally an agricultural festival. In common with other agricultural feasts it has been disassociated somewhat from its original nature worship and identified with an historical event and a spiritual meaning.

Easter has always been considered a festival of joy and uplift and so is the festival of the Passover. It falls in the spring, also, and lends itself to the spirit of joy and rejuvenation incident to the awakening of nature. Converted into a symbol of liberty and freedom, it signifies escape from bondage.

The historical event associated with the Passover is the chief element in its importance and significance. The Exodus of the ancient Hebrews from Egypt is connected with the Passover. In Exodus XII: 14-28, the Children of Israel are enjoined to observe the feast of unleavened bread throughout every generation on account of the hasty flight of their ancestors from the slavery of the taskmaster and oppressor. This marvelous escape from the bondage which had prevented them from enjoying their birthright of freedom and self-determination is commemorated in the Passover celebration.

MOLESTER OF WOMEN SENTENCED TO 90 DAYS IN JAIL

Joseph White, who was arrested after an exciting series of attempts at robbery, was sentenced in Judge D. R. Roberts' court Monday to ninety days in the city jail.

In the course of his testimony the prisoner pleaded that he did not know what led him to molest women. He declared he had never spoken any lewd word or threatened any woman. The man who has done this, he declared, is some other. He confessed that he had given way to this conduct for a matter of two years, but protested that he is not insane. He asked the clemency of the court, saying, "I promise you and the world that I will never behave in this fashion again."

Fire Protection Week April 23 to 28 Is Order

"Fire Protection Week" in Idaho is assured by the letter received today at the district forest offices from Governor Davis of Idaho. His letter said: "I shall be pleased to issue a proclamation as suggested by you for fire protection week, and I have written to Mr. Rutledge who made the same request through Mr. Fenn, that I shall do so."

The announcement of Governor Davis insures "Fire Protection Week" for four western states, Utah, Idaho, Washington and Oregon. The week will be observed from April 23 to 28.

A FOOL AT 40

It is an old proverb that every man is either a fool or a physician at 40. Well, I fooled along for 40 years in the practice of pharmacy and the study of medicine and therapeutics before I discovered the wonderful prescription for Number 40. For the blood. There is more of this wonderful prescription sold and used by the citizens of our home city than all other blood medicines combined. It is indicated in all depraved conditions of the system. In blood troubles, in sores, ulcers, eczema and skin diseases. In chronic rheumatism, catarrh, constipation, stomach, kidney and liver trouble. J. C. Mendenhall, 40 years a druggist.

Houston, Texas, Jan. 22, 1919. J. C. Mendenhall, Evansville, Ind. Dear Sir: "Having suffered from 12 to 18 months with a nervous breakdown, said by

LIBRARY NEEDS BEING CONSIDERED BY ALL U. S. STATES

State and local library needs are being considered at conferences of library trustees now being held throughout the country by the American Library association, which is conducting a \$2,000,000 "Books-for-Everybody" movement on a nation-wide basis. The money is being raised through the individual efforts of librarians, library trustees and friends of libraries without resorting to an intensive drive or campaign. Five library workers have been named to attend the conferences by the governors of each state. Hundreds of other trustees are attending the meetings.

The Pacific coast meetings take place in San Francisco from March 31 to April 3, and at Los Angeles from April 4 to 7.

Utah will be represented at the San Francisco conference by Dr. E. G. Gowans, Miss Mary E. Downey, state library organizer, and Miss Grace W. Harris, librarian of the Ogden Carnegie library and president of the Utah Library association.

CERTIFICATES GIVEN TO DISLOYAL MEN

Rep. Campbell Declares College Professors are Teaching Socialism and Anarchism

WASHINGTON, March 30.—"Bolsheviki, Socialists and anarchists are given teachers' certificates and they are teaching in every state in the union," Representative Campbell, Republican, Kansas, declared today, in the house.

College professors of high and low degree are Socialists, anarchists, enemies of congress, enemies of the constitution, enemies of this government and they teach it daily in the colleges," he said.

"A saphead Socialist from Harvard appeared recently before a committee of congress and admitted he was a Socialist and admitted he taught Socialism as a teacher in Harvard. They now admit it, and in a short time will be boasting of it."

Mr. Campbell said trustees should see to it that the Socialists are not employed to poison the youth of the country."

SALTS FINE FOR ACHING KIDNEYS

We eat too much meat which clogs Kidneys, then the back hurts

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders.

You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to flush clogged kidneys and stimulate them to normal activity. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia-water drink which everybody should take now and then to keep their kidneys clean.

A well-known local druggist says he sells lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.—Advertisement.

Senate May Put Over Aerial Mail Service

WASHINGTON, March 30.—An appropriation of 1,415,000 for aerial mail service from New York to San Francisco was written into the annual postoffice appropriation bill just before it passed the senate and was sent to conference. The house rejected a similar proposal, but senate leaders were hopeful.

The route planned is by way of Chicago and Omaha. Various proposals for southern routing were thrown out on points of order.

JUGO-SLAVS FRIENDS OF ITALIAN PEOPLE

ROME, March 28.—Premier Nitti declared in the chamber of deputies today that he had never regarded the Jugo-Slavs as enemies, but had regarded them as friends. He expressed hope that they would soon partake of Italian economic and cultural advantages and deplored what he described as "a dangerous press campaign which is calculated to foster distrust among the Jugo-Slavs."

"While anxious to bring about a friendly understanding with the Jugo-Slavs," he declared, "there is another solution to demand the enforcement of the pact of London. France and Great Britain have stated that if Italy desired the application of the pact they would not refuse, as they hold themselves bound by it. If Italy is compelled to determine the carrying out of the convention, it will be necessary to ask its complete enforcement without including Fiume."

Signor Nitti condemned that section of the press demanding the pact and also Fiume and said he had told the supreme allied council in London that if Italy requested the enforcement of the treaty, she would concede autonomy to Dalmatia.

"If no other agreement can be reached," he continued, "a third solution of the Adriatic question may be to accept, with suitable modifications, proposals formulated by Great Britain and France. This solution is desired still less by Jugo-Slavia than by Italy, but nevertheless it is necessary to keep it in mind while continuing our efforts to reach an adjustment by an amicable understanding with the Jugo-Slavs."

The premier was applauded by the whole chamber, with the exception of the Socialists, and asked for "a clear and unmistakable vote of confidence."

With this address the debate was adjourned.

Call on J. J. Brummitt at 2417 Hudson avenue, if you want to sell your Liberty bonds. Phone 59.

Sen. Newberry Waits Senate's Decision

WASHINGTON, March 30.—Senator Newberry of Michigan, who has returned, will not resume his seat in the senate until questions as to his status arising from his conviction in the Michigan election conspiracy cases have been disposed of.

"I shall not resume my activities in the senate," he said, "until all matters growing out of the proceedings in Michigan are cleared up."

Even should Mr. Newberry not participate in any roll calls, the Republican control of the senate by a majority of one would continue, the political alignment being forty-eight to forty-seven.

They Combat Film On Millions of Teeth Today

There is a new, scientific way to clean teeth. It combats the film—the great tooth enemy—as nothing else has done. And millions of teeth now show the effects of it.

It is known today that most tooth troubles are due to a slimy film. You can feel it with your tongue. It clings to teeth, enters crevices and stays. The tooth brush doesn't end it. The ordinary tooth paste does not dissolve it. So it remains on teeth and may cause a constant damage.

It Clouds the Teeth

That film is what discolors—not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. So, despite the tooth brush, all these troubles have been constantly increasing.

Dentists long have known this. Dental science has for years sought a way to end film. Now it has discovered an efficient film combater.

Able authorities have proved it by many clinical tests. Leading dentists everywhere have watched it and are urging its adoption. This is to offer a 10-Day Tube which will show what it means to you.

You Owe Yourself A Test, and It is Free

This new method is embodied in a dentifrice called Pepsodent—a scientific tooth paste. On every hand you see the glistening teeth of people who now use it. Ask for a free test and prove it for yourself.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it.

Pepsin long seemed impossible. It must be activated, and the usual agent is an acid harmful to the teeth. But the way is opened by discovery of a harmless activating method. Now active pepsin can be every day applied.

See What Ten Days Do

We do not argue Pepsodent effects. We send a tube to show them, and a book to state the reasons. Send the coupon for this 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how the teeth whiten as the fixed film disappears.

Look at your teeth now, then look in ten days. Let your own teeth decide. Learn what film removal means. Do this for your sake and your children's sake, for the film is vitally important. Then judge for yourself between the old ways and the new. Cut out the coupon now.
